Carlisle Healthcare products make work easier in any size Healthcare environment and provide you with your complete resource for high quality insulated trayware & disposable products

SMART•THERM STSII

Carlisle introduces the newest generation of induction heating systems. The Smart•Therm STSII is the newest generation and most innovative healthcare induction heating system for today's demanding foodservice traylines and Room Service operations.

SMART•THERM II FEATURES

- Countertop design, stainless steel housing, heavy duty electronic components and high impact ceramic-glass top, engineered for use in commercial kitchens.
- User Friendly LCD display and control panel for ease of use and automatic power control.
- Senses DineX Base automatically and gives the correct amount of heat to allow consistent temperature every time.
- Microprocessor monitors charging cycle time with Smart•Therm Base.
- Automatic pan detection allows for instant energy transmission to pan and no energy use when pan is not present. (120v only).
- Automatic shut-off feature prohibits overheating.
- Easy-to-clean ceramic-glass top surface.
- Available in single phase 120v, 208v and 240v.

DINEX® ULTIMA

Offers Exceptional Strength and Durability.

The Ultima Insulated Tray System offers an appealing meal presentation, combined with exceptional strength, durability and temperature retention. Ultima is designed to project the elegance of traditional round plate dining while providing superior flexibility and efficiency.

Ultima's fully compartmentalized servers and covers keep food temperature just right; and its rugged, one-piece blow-molded design is exceptionally durable under even the toughest applications.

DINEX® OMNI 'THE SLAMMER'

A Practically Indestructible Server.

Seamless construction that withstands the toughest handling & transport requirements has earned Omni its reputation as "The Slammer." Always maintains hot or cold - perfect for correctional facilities, remote wings, satellite facilities and any "Meals on Wheels" type of delivery system.

When Omni servers are stacked hot over hot and cold over cold, thermal columns form to extend heat retention up to 60 minutes from meal assembly to delivery. Each stack requires only one cover which means fewer pieces to wash, saving labor and energy.
